TRANSMITTAL OF THE FINAL 1989 BACKGROUND GEOCHEMICAL CHARACTERIZATION REPORT

EG&G is submitting the Final 1989 Background Geochemical Characterization Report for transmittal to the Colorado Department of Health (CDH) and the U. S. Environmental Protection Agency (EPA) on December 21, 1990. This report summarizes background ground water, surface water, sediment, and borehole material chemistry for the Rocky Flats Plant for samples collected in 1989. The Final report also contains additional data received after the Draft 1989 Background Geochemical Characterization Report was submitted to the EPA and CDH on December 15, 1989, and has a more extensive data analysis than the previous report.

Please contact M. B. Arndt (x4294) of my staff if you have any questions.

J. M. Kersh, Associate General Manager  
Environmental Restoration & Waste Management
